

Jane Kinney

Director of Business Operations

Jane Kinney is the Director of Business Operations of the Commercial Spaceflight Federation. Her main focuses for CSF include Export Control, Standards, Small Sats, and Spaceports.

She previously worked as a flight controller in Mission Control for the International Space Station Program at NASA Johnson Space Center. At the time she was a contractor who was employed by United Space Alliance.

Previously, she worked as a Systems Engineer Co-op for Ball Aerospace & Technologies Corporation in both the Boulder and Westminster, Colorado offices. During her time at BATC she worked on a range of programs including Kepler, the Ozone Mapping Profiler Suite (OMPS), and the National Polar-orbiting Operational Environmental Satellite System (NPOESS).

Kinney received a B.S. in Aeronautical and Astronautical Engineering from Purdue University with a minor in English Literature. Her degree technical focuses were Propulsion and Dynamics & Controls.

She spent a semester as a student and researcher at the Cape Eleuthera Institute's Island School in the Bahamas studying marine biology and environmental engineering with a focus on open ocean aquaculture.
