

DR. ANTHONY M. CALOMINO

Dr. Anthony M. Calomino is the NASA STMD program lead for Space Nuclear Systems technology development and demonstration activities. Anthony has been with NASA for over thirty years and worked on several high temperature materials and structures efforts ranging from turbine machinery to hypersonic vehicles and atmospheric entry systems. Over the last six years he has been working on materials and structures technology challenges for advanced nuclear systems and is now leading NASA's technology development for Space Nuclear power and propulsion systems.
