## KEY PROJECTS OR PRODUCTS

INDUSTRY LEADER IN 3-D PRINTING, AND MATERIAL AND DESIGN SOLUTIONS:  
Aerojet Rocketdyne has invested extensive time and resources for more than two decades to evolve additive manufacturing technology, also known as 3-D printing, to meet the stringent requirements of rocket engine and defense systems applications. This investment, as well as the addition of 3D Materials Technologies to the company, is paying dividends as we begin to incorporate 3D printing technology into production programs.
