

II-VI AEROSPACE & DEFENSE

WWW.IVIAD.COM

CORE COMPETANCY

As a vertically integrated provider, II-VI Aerospace & Defense is uniquely positioned to meet the critical and complex design, engineering, and production requirements of customers in the aerospace and defense industries. From concept design development through production, we closely collaborate with our customers to integrate the design and manufacture of optical systems and components that consistently exceed expectations on the most demanding projects.

KEY POINTS OF CONTACT

Jennifer Lehman Jennifer.lehman@iiviad.com

KEY PRODUCTS

Our expanding and extensive capabilities cover a wide range of products and applications, including high precision optical assemblies spanning the UV to LWIR, thin film coatings, optical and laser materials, aspheric optics, gimballed systems, hypersonic materials, optical coatings, radomes and antennas, spectral and coherent beam combined laser subsystems.

You should know that we also specialize in...

- ❖ Transparent SiC
- ❖ Diamond windows
- ❖ Reaction Bonded Silicon Carbide
- ❖ Ceramic YAG Powders
