CORE COMPETANCY

ZIRCAR Ceramics, Inc., a NY based manufacturer of high temperature insulation, heaters, and refractory products, is committed to providing solutions that fulfill or exceed our customers' requirements. Through implementation and maintenance of a quality management system that conforms to the ISO 9001 standard and establishment of quality objectives, we strive to continually improve the products we manufacture and sell, and enhance the value our customers obtain from their use.

High Temperature Insulation with very high Microwave transparency.

A number of our high temperature insulation products are of special interest to the Missile and Space community due to their ultra light weight and low thermal conductivity, excellent machineability and strength – and their very high transparency to Microwave and RF energies.

These products include:

Alumina Type ZAL-12. At 12 pcf density ZAL-12 is the lowest density rigid Al₂O₃ insulation manufactured.

<https://www.zircarceramics.com/wp-content/uploads/2019/10/ZAL-12.pdf>

Alumina Type ZAL-15. At a higher (15 pcf) density ZAL-15 brings utility to applications that demand higher strength.
